PROFESSIONAL SUMMARY

Artificial Intelligence Engineer passionate about building practical solutions with machine learning , NLP , and data analytics . Through academic and personal projects , I have developed predictive models, AI-powered applications, and business intelligence dashboards using real-world data. I enjoy turning complex data into meaningful insights and creating systems that solve real problems. Currently pursuing a Master's degree in Artificial Intelligence at Damascus University while continuing to expand my expertise in applied AI and intelligent systems.

PROJECTS

Account Intelligence Radar - AI Business Intelligence Tool | AVERROA IT Launchpad [View on GitHub](#)

AI Solution Architecture & Development

- Developed an AI-powered research assistant that automatically generates structured company intelligence reports.
- Combined web data collection, information extraction , and LLM-based synthesis into a single workflow.

Tools: Python, LLM APIs, SerpAPI, Firecrawl

Procurement Process Digitalization MVP | AVERROA IT Launchpad [View on GitHub](#)

Full-Stack Web Development & Business Process Digitalization

- Built a web application to digitalize the manual procurement cycle of a manufacturing factory, replacing paper-based workflows with a structured digital system.
- Implemented role-based authentication (Admin/Purchasing/Planning/Viewer), PR status tracking with full audit trail, and automated RFQ PDF generation.

Tools: Python, Flask, SQLite, ReportLab, bcrypt, Jinja2, HTML/CSS

“NYC Restaurant Health Inspection” - Score Prediction | academic project [View on GitHub](#)

ML Pipeline Design & Model Development

- Developed a machine learning solution to predict restaurant health inspection scores using large scale public data.
- Built and evaluated multiple predictive models, achieving strong performance and generating actionable insights for inspection risk assessment.

Tools: Python, Scikit-learn, CatBoost, XGBoost, LightGBM, Optuna, NLP

“Cyclistic Bike-Share Analysis” - Google Data Analytics Capstone | personal project [View on GitHub](#)

Data Analytics & Business Intelligence

- Analyzed rider behavior patterns across millions of bike-share trips to identify differences between casual users and annual members.
- Delivered business recommendations through an interactive dashboard to support customer conversion and marketing strategies.

Tools: Power BI, Power Query, DAX, Excel / CSV

“HealthClub” - AI Diet & Exercise Recommendation App | academic project

[View on GitHub](#)

Backend Development & AI Integration

- Developed a personalized health recommendation application providing diet and exercise guidance.
- Integrated expert-system logic with backend services to deliver tailored recommendations for users.

Tools: Python, Flask, Laravel, MySQL, KBS

“IoT Smart Home” - Energy & Environment Monitoring Dashboard | personal project

[View on GitHub](#)

Data Analytics & Dashboard Development

- Designed a smart home analytics dashboard to monitor energy consumption and environmental conditions across multiple rooms.
- Identified operational inefficiencies and proposed data-driven automation opportunities to improve energy usage.

Tools: Power BI, Power Query, DAX, Custom 3D Map Visual

Superstore Sales Performance Dashboard | personal project

[View on GitHub](#)

Business Intelligence & Data Analytics

- Built a sales analytics dashboard to evaluate revenue, profit, and product performance trends.
- Generated business insights that highlighted low-profit categories and opportunities for performance optimization.

Tools: Power BI, Power Query, DAX

Arabic Text Summarization | academic project

[View on GitHub](#)

NLP Research & Development

- Built an Arabic text summarization system focused on extracting key information from long-form content.
- Addressed language-specific NLP challenges and improved accessibility of Arabic textual information.

Tools: Python, NLTK, Jupyter Notebook, Arabic NLP

“GuardiPosture” Real-Time Posture & Eye Strain Monitor | graduation project

Computer Vision & AI System Development

- Developed an intelligent system that detects posture issues and eye strain in real time using computer vision techniques.
- Integrated machine learning models with backend services to enable efficient real-time monitoring and feedback.

Tools: Python, OpenCV, Scikit-learn, FastAPI

EDUCATION

M.Sc. in Artificial Intelligence | May 2026 – Present

Damascus University, Damascus, Syria

B.Sc. in Informatics Engineering — Artificial Intelligence | 2026

Damascus University, Damascus, Syria

EXPERIENCE

Career Readiness & Digital Skills Trainee Averroa IT Launchpad – Syria Cohort | June 2026

- Completed Averroa IT Launchpad, Syria Cohort, a non formal professional development programme focused on IT career readiness, digital skills orientation, certification strategy, CV and LinkedIn positioning, proof of skill development, and personal career planning. Completed with distinction in recognition of outstanding engagement, professionalism, and achievement.

SKILLS

- **Programming** : Python, SQL, R.
- **ML & AI** : Scikit-learn, CatBoost, XGBoost, LightGBM, Optuna, NLP (TF-IDF, SVD, NLTK), Computer Vision (OpenCV), Knowledge-Based Systems.
- **Data & BI** : Pandas, NumPy, exploratory data analysis, data cleaning, Power BI (DAX, Power Query), Tableau, KPI dashboards.
- **Backend & APIs** : FastAPI, Flask, Laravel, RESTful APIs.
- **Databases & Tools** : MySQL, SQLite, Git, GitHub, Jupyter Notebook, Google Colab.

ACHIEVEMENTS & CERTIFICATIONS

- Top 4 Finalist at HerWILL AI for Digital Safety Datathon 2026 | [View Credential](#)

Developed an AI solution for digital safety challenges and ranked among the top-performing teams in the competition.

- Google Data Analytics Professional Certificate | [View Credential](#)

A hands-on program covering data cleaning , analysis, and visualization with spreadsheets , SQL , R , and Tableau . My capstone project was the Cyclistic Bike-Share analysis , where I worked with over 6 million ride records using Power BI and SQL.

- Certificate of Completion with Distinction Averroa IT Launchpad, Syria Cohort | [View Credential](#)

Recognized for outstanding engagement, professionalism, and achievement.
